You may have been approached by a freshii union buster. Union busters are paid to talk you out of doing what may be in <u>your</u> best interest to further the interests of the company you work for. Because of this, we think it is important that you know all the facts before you make any decision based on union buster propaganda alone. Remember: union busters will often tell workers they may get things like small pay increases, more favorable hours, or really anything else, but these promises cannot be kept true for all workers unless all workers work TOGETHER!

Union Busters Say

Unions are corrupt and hierarchical organizations! They pay outside agents to tell you how to do your job while their fat cat bosses rake in the dough!

Unions steal all your money through expensive dues taken right from your paycheck. You won't have any say in how it's spent. This money may even be used to fund a political candidate you don't support!

Unions are an outside force that will tell you how to act, when to work, and may even make you go on strike!

Unions are anti-American Anarchist-Communists!

This Freshii is a small business. A union will kill profits and force the store to close its doors.

Nobody needs a union anymore! It's 2014 and there are minimum wage laws, child labor laws, workers comp! Regardless, this company is a family and we look out for each other. Would you want a union getting between you and your FAMILY?

Class Conscious Workers Know

The IWW is a COMPLETELY worker-run organization. and all decisions are made directly by members. There are no union bosses in the IWW, only members who fill directly elected positions. The IWW does not hire ANY paid organizers, but instead equips every member with the skills to organize.

The IWW has the lowest dues of any union and does NOT take dues directly from your paycheck. Again, all financial decisions are made by the members! The IWW also does not support any political candidates or parties.

The workers ARE the union. Only the workers themselves can make decisions regarding the workplace. The IWW cannot and will not tell you what action to take, but will support all workers financially and otherwise.

The labor movement is one of the greatest American traditions! The IWW was born in the USA in 1905 and has helped win many of the rights workers enjoy today! The IWW's ONLY political statement is that workers should own the fruits of their labor, not be exploited by low wages while bosses keep the profits.

According to the Freshii CEO, Matthew Corrin, only 1/100 applicants are granted a franchise. Owners MUST have a liquidity of $150,000 and a personal net worth of $500,000 Freshii made $31,600,000 last year alone.

A family shares what they create; they don't force you to do all the work while they reap the rewards. If you want higher wages, decent benefits, and job security, you need to organize with your fellow workers to fight for what you deserve, and for what the bosses are willing to pay union busters huge sums to prevent you from winning.
